PERSONAL OBJECTIVE

Improve the quality of life of my society through knowledge and skills acquired, continue to learn and improve my knowledge in the field of software engineering and achieve my personal success always considering the ethics that guide my actions.

EXPERIENCE

Mensajeros Urbanos Bogotá, Colombia October 2015 - Present

FullStack Software Developer

- The greatest goal that I have accomplished in this job was build the new Software Architecture for the company, because was a big Development, with a lot of features but with low budget and time, despite all the milestones were accomplishment and I had the opportunity to lead the team and find my personality in the middle of a Software Team. Today Mensajeros Urbanos have a very strong architecture with a Real Time support and a good API for external connections, in the other hand I change the front and today have include automation process for Continuous Integration and Quality.
- Today I'm working in the implementation of an algorithm to improve the routes, times and cost in the delivery process, the objective is create a better service and gain of a very well differentiation in the market

Mareigua Bogotá, Colombia May 2015 - October 2015

Software Developer

- There was amazing things like the well defined process, the strong software, the challenges with big data, I really learned a lot of follow complex development process. My Job was develop a migration to .NET framework, insert new requeriments in the ETL process using SQL Server.

La Cadena Retail Bogotá, Colombia June 2014 - May 2015

Junior Software Developer

- Was my first job, the principal client was the Supermarket Olimpica, in one year I helped to develop the Treasury Application that actually controls all the Financial process for that company. My responsibility was transversal, working in DB2, Java with Spring and finally Angular. My best skills were applied to the Front, AngularJS was new for me and the team but the great team work enabled the good development process in all project stages.

EDUCATION

Escuela Colombiana de Ingeniería Julio Garavito Bogotá, Colombia April 2016

Bachelor's Computer Science

Honors:

- Scholarship for academic excellence
- Contestant in the 2014 Cartagena GSF-WEEF
- GSF-organizer Dubai WEEF 2015
- 2013-2014 student leader

Universidad de los Andes Bogotá, Colombia

Master in Software Engineering

SKILLS

- Amazon Web Service and Heroku, for deploy, scaling and modeling complex architectures
- FrontEnd skills: AngularJS, React, Ionic, Automation gulp and bower
- BackEnd skills: Java, .NET and Go.

- Databases: MongoDB, Oracle, MySql SQLServer, ReThinkDB
- Lead work teams.
- Ability to present in public
- Rapid adaptation to change and learning
- Integrate Web development with LogEntries, Hotjar, Mixpanel and Travis.
